ADA COMPLIANT 'T' BASES

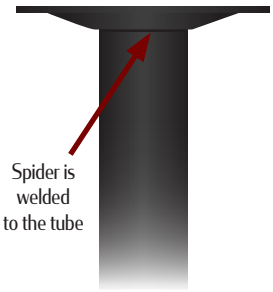

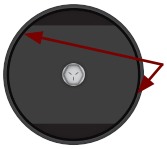

- Constructed of stamped steel for unparalleled strength & stability
  - Superior to cast iron table bases in that stamped steel will not fracture under heavier weights
- Standard height base is 28-3/4"
  - Finishes at approximately 30" with table top attached
  - ADA compliant tables must have a surface height of no less than 28" and no more than 34" above the floor
- ADA tube/spider allows 30" x 48" tables to be ADA compliant
  - ADA compliant tables must have 30" wide clearance between bases
- 3" tube diameter
- Available with 5" x 22" or 5" x 30" foot
- Easy two-piece assembly (tube/spider to base)
  - Oak Street uses a short bolt to screw into a welded anchor plate
- Spider is welded to the tube for added strength
- Spider attaches to table top with (8) 3/4" #10 screws
- Includes non-marring, adjustable black levelers

SPIDER / TUBE TOP (SIDE)

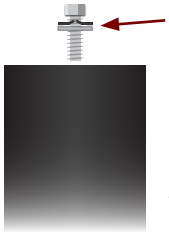

TUBE BOTTOM (BOTTOM)

Welded anchor plate at bottom of tube.

Anchor plate also has a welded nut on back of anchor plate.

TUBE BOTTOM (SIDE)

Oak Street uses a short bolt to screw into the welded anchor plate. This is a much improved method than the competitors, which use a long rod that will torque & stretch when force is applied - making it permanently loose.

Our bolt also has both a lock washer & a flat washer. The flat washer keeps the lock washer from catching on the anchor plate, preventing the bolt from becoming loose.
